

MALLORY SONALERT PRODUCTS, INC.

September 4th, 2008

CE Marking on Alarms, Buzzers, Transducers, & Speakers Sold by Mallory Sonalert Products, Inc.

The alarms, buzzers, transducers, speakers, and other products & accessories sold by Mallory Sonalert Products, Inc. are individual components that must be incorporated into final equipment in order to be useful. Since their safety and use depends to a very large extent on how they are incorporated, they are not covered by the various European Directives, and need not be CE marked.

In particular, the European Commission guidelines on the Low Voltage Directive (73/23/EEC) specifically states:

“Taking into the account the objectives of the ‘Low Voltage’ Directive, such basic components, the safety of which can only, to a very large extent, be assessed taking into account how they are incorporated, are not covered as such by the Directive. In particular, **they must not be CE marked.**”¹

Therefore, the products available from Mallory Sonalert Products, Inc. are not required to be CE Marked, and per the above statement, they must not have a CE Mark.

A handwritten signature in blue ink that reads "Dan Clark". The signature is written over a horizontal line.
